HONORARY EDITORIAL ADVISORY BOARD

R. A. BROOKER (*Manchester*)
L. FOX (*Oxford*)
D. C. GILLES (*Glasgow*)
A. S. HOUSEHOLDER (*Oak Ridge*)
G. F. J. TEMPLE (*Oxford*)
A. THOM (*Oxford*)
J. H. WILKINSON (*N.P.L., Teddington*)

SCIENTIFIC TRANSLATION EDITOR:
R. C. GLASS, M.A., M.Sc.,
The City University, London

Translators: D. E. BROWN, R. C. GLASS, Z. LERMAN, D. LOUVISH, C. MULLINGS, S. RHODES and E. L. SHORT

Publishing and Advertising Office:
Pergamon Press plc, Headington Hill Hall, Oxford, OX3 0BW, U.K.

Subscription Rates
Annual Institutional subscription rate (1989) DM 2010.00
2-year Institutional rate (1989/90) DM 3819.00
Subscriptions are only serviced after payment has been received and are not accepted for less than one year. Prices are subject to change without notice.

Subscription enquiries from customers in America should be sent to:
Pergamon Press Inc., Maxwell House, Fairview Park, Elmsford, NY 10523, *U.S.A.,*
and for the remainder of the world to:
*Pergamon Press plc, Headington Hill Hall, Oxford OX*3 0*BW, U.K.*

Microform Subscriptions and Back Issues
Back issues of all previously published volumes are available direct from Pergamon Press.
Back issues of Pergamon journals in microform can be obtained from:
UMI, 300 North Zeeb Road, Ann Arbor,
Michigan 48106, U.S.A.

VOLUME CONTENTS

VOL. 27, NO. 1 CONTENTS 1987

Translation of Number 1

O. A. LISKOVETS 1 Regularization of problems with monotonic operators when the spaces and operators are discretely approximated

KH. I. SEMERDZHIYEV and S. G. TAMBUROV 9 A method of determining all the zeros of a generalized polynomial with respect to an arbitrary Chebyshev system

V. A. ZHELUDEV 14 Restoration by local splines of functions and their derivatives from mesh data with an error

V. N. NEFEDOV 23 The search for a global maximum of a function of several variables in a set specified by constraints of the inequality type

D. L. MARKIN and R. G. STRONGIN 33 A method for solving multi-extremal problems with non-convex constraints, that uses *a priori* information about estimates of the optimum

I. P. BOGLAYEV 39 Numerical integration of initial value problems for systems with a small parameter in the derivative

B. P. GERASIMOV and I. A. KUL'CHITSKAYA 48 Single-step representation of linear multistep methods for ordinary differential equations

G. A. SEREGIN 53 On a variational difference scheme for problems of limiting equilibrium

V. A. BABESHKO, E. V. GLUSHKOV and N. V. GLUSHKOVA 60 Methods of constructing Green's matrix of a stratified elastic half-space

S. A. GABOV and YU. D. PLETNER 66 The gravitational-gyroscopic wave equation: the angular potential and its applications

E. V. DYUKOVA 74 The complexity of the realization of certain recognition procedures

Short Communications

S. YA. VILENKIN and A. N. KALASHYAN 84 Round-off errors in Richardson's extrapolation method

P. D. SHIRKOV 86 Difference schemes for non-autonomous stiff systems of ordinary differential equations

S. KH. DZHUMAGAZIYEVA and E. I. TIKHOMIROVA 90 The convergence of a certain iteration method

M. I. KONTOROVICH and YU. N. NOVIKOV 94 An iterative method of solving certain electrodynamic problems

V. P. MODENOV 97 Galerkin's method in non-selfadjoint boundary value problems of the theory of waveguides

V. S. BARASHENKOV, LE VAN NGOK and S. YU. SHMAKOV 101 Propagation of nuclear-particle fluxes in the atmosphere

A. B. ISAKOV 105 Numerical solution of the three-dimensional problem of stationary convection in natural variables

Translation of Number 2

M. I. SUMIN 106 Optimal control of systems with approximately known initial data

M. G. KLEPIKOVA 116 On the stability of the linear problem of multicriterion optimization

I. P. BOGLAYEV 122 Numerical methods of solving boundary value problems for systems with a small parameter in the derivative

T. S. AKHROMEYEVA and G. G. MALINETSKII 132 On the strange attractor in a problem of synergetics

A. V. NESTEROV 141 Asymptotic behaviour of the solution of a singularly perturbed boundary value problem for the system of diffusion–sorption equations

V. F. BUTUZOV, N. N. NEFEDOV and E. V. FEDOTOVA — 146 Asymptotic solution of the linearized problem of the propagation of sound in a bounded medium with low viscosity

S. A. GABOV — 153 On the non-stationary theory of internal waves. Existence theorems

B. A. BOLODIN and A. M. KHAPAYEV — 159 The solution of one problem associated with the dynamics of an electron

A. S. IL'INSKII and YU. G. SMIRNOV — 163 Mathematical modelling of the propagation of electromagnetic waves in a slotted transmission line

YU. K. SIRENKO and V. P. SHESTOPALOV — 170 Free oscillations of an electromagnetic field in one-dimensional periodic gratings

G. M. LOKHOV and S. I. PODZOROV — 176 Numerical investigation of the motion of rigid bodies in the atmosphere

Short Communications

B. ALIEV — 185 A generalized discrepancy principle for the L-pseudosolutions

YU. A. BELOV and V. S. KAS'YANYUK — 189 On the interpretation of data obtained by a finite set of receptors with unstable characteristics

I. V. ANDRIANOV and A. O. IVANKOV — 193 Application of the Padé approximant in the method of introducing a parameter when investigating biharmonic equations with complex boundary conditions

S. S. ARSEN'YEV-OBRAZTSOV and T. M. ZHUKOVA — 197 Absorbent boundary conditions for the numerical solution of problems of the theory of visco-elasticity

A. K. SHATOV — 201 Types of Kelvin waves in a compressible stratified fluid

O. M. MAKAROV — 205 A non-commutative algorithm for multiplying 5×5 matrices using one hundred multiplications

VOL. 27, NO. 2 CONTENTS 1987

Translation of Number 3

A. A. KOZLOV and YU. P. PYT'YEV — 1 The efficiency of reduction of measurements and some problems of metering–computing assembly design

I. S. LITVINCHEV — 6 Method of expansion for optimization problems which do not have a block-separable structure

N. S. VASIL'YEV — 12 Numerical solution of extremal problems on constructing ellipsoids and parallelepipeds

S. K. ANDRUSENKO, E. A. NURMINSKII and P. I. STETSYUK — 18 Numerical experiments in a new class of algorithms in linear programming

N. B. ZYABREV — 23 Non-linear programming problem with decreasing cost function and the properties of its solution

A. S. ANTIPIN — 30 Methods of solving systems of convex programming problems

E. G. ANTSIFEROV and V. P. BULATOV — 36 An algorithm of simplex imbeddings in convex programming

V. A. NOVIKOV, E. A. NOVIKOV and L. A. YUMATOVA — 41 Freezing of the Jacobi matrix in the second order Rosenbrock method

V. F. BUTUZOV and V. M. MAMONOV — 45 Smoothing in a singularly disturbed quasilinear parabolic problem

A. A. ARSEN'YEV — 51 On the approximation of the solution of the Boltzmann equation by solutions of the Ito stochastic differential equations

V. P. KOTENEV, V. I. SAKHAROV and G. A. TIRSKII — 59 The calculation of the supersonic circumfluence of three-dimensional blunt bodies by a chemically non-equilibrium stream of gas

O. I. DRIVOTIN and D. A. OVSYANNIKOV — 62 Determination of the stationary solutions of the Vlasov equation for an axially symmetric beam of charged particles in a longitudinal magnetic field

Yu. A. Volkov and A. N. Polyudov	71	A discrete model of the Fokker–Planck equation
V. I. Gryn	80	On inverse problems of the theory of radiation transport in two-dimensional geometries
		Short Communications
I. V. Kochikov, A. N. Matvienko and A. G. Yagola	91	A method of regularization for solving inconsistent non-linear operator equations
V. N. Solov'yev	93	The duality of certain non-convex extremal problems
N. D. Kopachevskii and M. Yu. Tsar'kov	96	On the problem of the spectrum of the buoyancy operator
M. M. Zimnev and I. Yu. Popov	99	Selection of parameters for a model of cracks of zero width
S. I. Lyashko	102	Numerical methods for solving problems of optimal impulse control
		Translation of Number 4
A. M. Levin	106	The stability of constructing minimizing sequences of functionals
F. V. Lubyshev	110	On the accuracy of difference approximations and the regularization of optimal control problems on solutions of elliptic equations
N. B. Konyukhova and T. V. Pak	118	Singular Cauchy problems with a large parameter for systems of non-linear ordinary differential equations
V. V. Larchenko	132	Bifurcation of solution in conditions of singular disturbance
P. N. Vavishchevich and P. A. Pulatov	141	Numerical solution of the Neumann exterior problem
A. Ya. Boiko	147	The construction of completely conservative difference schemes by algorithms of the projection method
A. A. Arsen'yev	155	Estimates of the rate of convergence of the particle method for Vlasov's equation
S. V. Rogazinskii	160	One approach to the solution of the uniform Boltzmann equation
P. B. Dmitriyev	168	On the theory of capillary waves on a shallow layer of compressible water
A. V. Rodionov	175	Monotonic scheme of the second order of approximation for the continuous calculation of non-equilibrium flows
O. M. Belotserkovskii, V. A. Gushchin and V. N. Kon'shin	181	The splitting method for investigating flows of a stratified liquid with a free surface
N. G. Beletskii	191	Problems of the correction of the parameters of an object in pattern recognition
		Short Communications
A. B. Bakushinskii	196	Iterative regularizing algorithms for non-linear problems
V. V. Vershinin and N. N. Pavlov	199	Splines in a convex set, and the problem of numerical differentiation
V. A. Lyul'ka and I. A. Fumyantsev	203	The construction of a plane curve with a piecewise-linear change of curvature
V. V. Varlamov	206	On the fundamental solution of an equation describing the propagation of longitudinal waves in a dispersive medium
P. I. Naumkin	209	Whitham's equation with a singular kernel
V. I. Zubov, V. M. Krivtsov, I. N. Naumova and Yu. D. Shmyglevskii	212	Remarks on the paper "Numerical comparison of different models of the vapourisation of metals"

VOL. 27, NO. 3 CONTENTS 1987

Translation of Number 5

A. L. AGEYEV — 1 — The method of quasisolutions for the problem of determining the eigenfunctions of a linear operator

A. YU LUCHKA, O. E. NOSHCHENKO, I. V. SERGIYENKO and N. I. TUKALEVSKAYA — 6 — Accelerated method of conjugate gradients

V. N. NEFEDOV — 13 — Polynomial optimization problems

O. A. SHCHERBINA — 22 — On quasiblock discrete programming problems with supplementary constraints

B. V. PAVLOV and O. E. RODIONOVA — 30 — The method of local linearization in the numerical solution of Stiff systems of ordinary differential equations

G. T. GOLOVIN — 38 — A composite method of solving two-dimensional stationary selfconsistent problems

S. A. GABOV and YU. D. PLETNER — 44 — Solvability of an exterior initial-boundary value problem for the gravitational gyroscopic wave equation

S. I. LYASHKO and S. E. RED'KO — 49 — Approximate solution of a problem of the dynamics of a viscous stratified liquid

B. V. ALEKSEYEV — 57 — Hydrodynamic equations in the kinetic theory of reacting gases

S. A. VASIL'YEVSKII, G. A. TIRSKII and S. V. UTYUZHNIKOV — 64 — A numerical method for solving the equations of a viscous shock layer

YU. L. LEVITAN and B. D. MOISEYENKO — 72 — Viscous and elastic stress tensors in hydrodynamic computations

T. V. PLOKHONINA — 80 — The correctness of algebraic closures of finite degree of a family of estimate-computing algorithms for regular problems

Short Communications

N. G. USHAKOV — 85 — An algorithm for reconstructing functions

A. YU. POTEKHIN — 89 — The solution of statistical radiation transport problems by the Monte-Carlo method

A. V. KOLDOBA, YU. A. POVESHCHENKO and YU. P. POPOV — 91 — Two-layer completely conservative difference schemes for the equations of gas dynamics in Euler variables

E. I. TIKHOMIROVA — 95 — Numerical solution of the problem of stabilization by heating a turbulent layer in a flow without shift

A. A. MAKHMUDOV — 98 — Numerical solution of some problems of shallow-water theory

D. I. NIKOLAYEV and T. I. SAVELOVA — 101 — Approximation of the solution of the inverse diffraction problem by δ-functions and by Gaussian distributions

102 — Errata

Translation of Number 6

B. A. BEL'TYUKOV — 103 — An analogue of the Aitken–Steffensen method with controlled step

M. K. ZAVRIEVA — 113 — A method of seeking the stationary points of a connected max–min

V. G. ZHADAN and V. I. KUSHNIRCHUK — 120 — Method of feasible directions for solving problems of convex multicriterion optimization

V. P. TARASOVA — 127 — Optimal strategies for restoring characteristic functions

N. B. KONYUKHOVA and T. V. PAK — 132 — On the transfer from infinity of admissible boundary conditions for systems of linear ordinary differential equations with a large parameter

V. L. MAKAROV and A. I. RYZHENKO — 147 — Matched estimates of the rate of convergence of the net method for Poisson's equation in polar coordinates

M. B. Belyi, V. E. Bulgakov and A. B. Zolotov — 153 A semi-iterative multigrid method and its implementation as a program for solving spatial boundary value problems

V. P. Belichenko — 162 Diffraction of electromagnetic waves by a wedge with anisotropically conducting faces

M. I. Gradoboyev and V. A. Rykov — 168 Monatomic rarefied gas flow over a circular rotating cylinder

M. K. Kozlov — 172 Computational possibilities of the apparatus of generating functions in discrete problems

N. N. Aizenberg, Yu. I. Zhuravlev and S. V. Pilyugin — 177 The use of convolution algebras to construct correct recognition algorithms

A. Yu. Kogan — 185 Disjunctive normal forms of Boolean functions with a small number of zeros

R. S. Ayupov — 190 A property of Hurwitz matrices in the regularization of a system of linear algebraic equations

O. V. Zhuravlev, A. A. Kozlov and Yu. P. Pyt'yev — 192 On the limit possibilities of second-order measurement transducers

V. I. Zubov, V. M. Krivtsov, I. N. Naumova and Yu. D. Shmyglevskii — 196 Comparison of three methods of calculating the flow of a viscous gas over plates

Yu. A. Eremin — 200 The construction of complete systems in the theory of diffraction

L. I. Lipkin — 204 Representation of Boolean functions with a predetermined number of zeros by systems of linear inequalities

S. V. Peigin — 206 A numerical method of an increased order of approximation for solving two-dimensional problems of boundary layer theory

V. I. Gryn — 207

Translation of Number 7

A. G. Pavel'yev — 1 The conditions for a solution to exist and the analytic regularization of the solution of some Fredholm equations of the first kind

S. I. Repin — 9 Minimization of a class of non-differentiable functionals by a relaxation method

E. N. Gordeyev — 14 Algorithms of polynomial complexity for computing the radius of instability in two classes of trajectory problems

R. E. Lepp — 20 Discrete approximation and stability of the stochastic programming problem with complete recourse

A. V. Nesterov — 28 The proof of a quasi-equilibrium approximation in the theory of sorption dynamics

V. F. Butuzov and V. M. Mamonov — 33 On a singularly perturbed quasilinear parabolic problem with unsmooth corner boundary functions

A. V. Bayev — 40 An iterational method of solving an inverse problem for the wave equation in a segment

A. A. Amosov and A. A. Zlotnik — 46 Difference schemes of second-order of accuracy for the equations of the one-dimensional motion of a viscous gas

E. A. Guseinov and A. S. Il'inskii — 58 Integral equations of the first kind with a logarithmic singularity in the kernel and their application in problems of diffraction by thin screens

N. Yu. Orlov	64	Quantum-statistical calculation of the properties of a mixture of chemical elements allowing for fluctuations in the occupation numbers of electron states
G. G. Elenin, V. V. Krylov and N. V. Sosnin	71	Reduction and analysis of the solutions of the problem of the crystallization of filtered solutions
V. I. Gryn, V. I. Zubov and V. M. Krivtsov	78	Numerical solution of an inverse problem of the dynamics of a radiating gas with axial symmetry
L. B. Zhuk	82	The choice of the number of particles for the "particles in cells" method
		Short Communications
A. L. Zheleznyak and V. R. Kogan	89	A method of solving one class of singularly perturbed boundary value problems
S. A. Gabov and A. A. Tikilyainen	94	A third-order differential equation
A. Ashirov	98	The completeness of radical functions in the problem of the oscillations of a viscous stratified fluid in an elastic shell
T. Ya. Grudnitskaya, V. A. Lyul'ka and A. V. Shipilin	100	Calculation of the mechanical quantities of a hydrodynamic flow by a numerical solution of the Navier–Stokes equations
I. E. Mikhailov	104	The necessary conditions for the optimality of three-dimensional bodies in a supersonic gas flow
		Translation of Number 8
A. S. Leonov	107	The minimal pseudo-inverse matrix method
Vy Duong Thuy	117	Some higher-order iterative processes for solving non-linear operator equations
I. Kh. Sigal	121	**An algorithm for solving large-scale travelling-salesman problems and its numerical implementation**
A. Z. Ishmukhametov	127	**The approximation of second-order hyperbolic differential-operator equations**
E. A. Volkov	136	**Approximate conformal mapping of certain polygons onto a strip by the block method**
S. A. Dzhangirova	142	**Convergence of the summary approximation method for certain non-linear equations of parabolic type**
S. A. Gabov and P. A. Krutitskii	148	**On the non-stationary Larsen problem**
R. R. Gabdullin	155	**The diffraction of internal waves by a half plane immersed parallel to the free surface of a compressible liquid**
E. I. Andriankin, V. A. Andrushchenko and N. N. Kholin	160	**Numerical solutions of problems in wave dynamics using an ES-1055 M matrix processor**
G. F. Maslennikova	166	**The problem of the scattering of a planar acoustic wave by a thin solid of rotation in a two-layer medium**
G. L. Korol'yev	175	**A method of solving problems of the asymptotic theory of interaction between the boundary layer and the external flow**
P. N. Korotin, I. B. Petrov, V. B. Pirogov and A. S. Kholodov	181	**On a numerical solution of related problems of supersonic flow over deformable shells of finite thickness**
		Short Communications
S. B. Pshenichnikov and R. M. Yamaleyev	188	**Methods of inverting matrices of order 2^n**
N. B. Pavlov	192	**_A posteriori_ estimates of inverse operations using projection methods**
V. L. Makarov and A. I. Ryzhenko	195	**Matched convergence-rate estimates of the mesh method for the axisymmetric Poisson equation in spherical coordinates**

A. R. MAIKOV, A. D. POYEZD and S. A. YAKUNNIN — 197 — Calculation of transients in a microwave amplifier with a dielectric filling

A. A. MAKHMUDOV — 201 — Extension of the SHASTA method to the numerical solution of the two-dimensional non-stationary equations of shallow water

S. V. TROFIMOV — 205 — Optimization of the weighting factors in recognition algorithms with representative sets

---

VOL. 27, NO. 5 CONTENTS 1987

Translation of Number 9

E. I. SAKALAUSKAS — 1 — Stochastic projection spline regularization based on the discrepancy principle

V. A. ZHELUDEV — 8 — Local spline approximation on a uniform mesh

G. A. MIKHAILOV — 20 — Vector Monte Carlo methods for computing disturbances and derivatives with respect to parameters

L. F. YUKHNO — 26 — Numerical solution of the non-linear spectral problem for symmetric matrices

M. A. GORELOV and A. F. KONONENKO — 31 — On the construction of solutions in dynamic models of multilateral conflicts

V. S. NERONOV — 37 — Optimal control of thermal-neutron nuclear reactors

R. D. BABAYEV — 47 — Generation of covering and partition test problems

G. I. SHISHKIN — 54 — Approximation of solutions of singularly perturbed boundary-value problems with a corner boundary layer

S. A. DZHANGIROVA — 64 — Multipoint problems for systems of ordinary differential equations

P. N. VABISHCHEVICH, R. V. GASSIYEV and P. A. PULATOV — 68 — Computer implementation of the fictitious domain method for elliptic equations, based on the alternate-triangular method

V. L. IVANOV — 73 — Approximation of systems of hyperbolic equations that contain large parameters in the non-differential terms

YU. A. YEREMIN and N. V. ORLOV — 77 — A method for investigating vector problems of diffraction by scatterers in a half space

N. N. KATERINOCHKINA — 82 — The problem of finding the maximum upper zero for a series of subclasses of monotonic Boolean functions

Short Communications

A. S. LEONOV — 88 — Numerical realization of piecewise-uniform regularization algorithms

S. F. GILYAZOV and V. A. MOROZOV — 91 — An estimate of the error of the solution of systems of linear algebraic equations

YU. A. KLOKOV and A. YA. SHKERSTENA — 93 — Error estimates for Lagrange–Chebyshev interpolation formulae

V. S. STEPANOV — 95 — The method of fictitious boundary value elements

S. M. POPOMAREV — 98 — On the diffusion of an intense magnetic field into a thin incompressible conductor

R. R. GABDULLIN and A. K. SHATOV — 102 — Diffraction of internal waves by a half-plane, parallel to the free surface of a liquid

Translation of Number 10

F. P. VASIL'YEV — 106 — The use of unsmooth penalty functions in the regularization of unstable minimization problems

V. A. BEREZNEV, V. G. KARMANOV and A. A. TRET'YAKOV — 112 — On the choice of parameters in the method of penalty functions

E. N. KHOBOTOV 120 Modification of the extra-gradient method for solving variational inequalities and certain optimization problems

A. M. VALUYEV 128 A numerical method for multistep optimization problems with stepwise computation of search direction

K. BALLA 138 Estimate of the error of an approximate solution of certain singular ordinary differential equations

YU. B. SURIS 149 Some properties of methods for the numerical integration of systems of the form $\ddot{x} = f(x)$

I. P. BOROVIKOV and YU. L. GAPONENKO 157 A method of linearizing the inverse problem for the wave equation

V. B. ANDREYEV 165 An analysis of one difference scheme for the Laplace equation in a singularly perturbed region

I. O. AKHVERDIYEV, V. F. BAKLANOVSKAYA and S. A. DZHANGIROVA 171 Convergence of the method of nets for third-order non-linear partial differential equations

YU. K. SIRENKO and V. P. SHESTOPALOV 184 Principles of radiation, limit absorption and limit amplitude in problems of the diffraction of waves by one-dimensional periodic gratings

I. L. OSIPOV, A. V. SHIPILIN and N. P. SHULISHNINA 190 A numerical method for calculating gas flows in channels and nozzles in the direct, inverse and combined formulations

Short Communications

I. V. KOSHCHEYEVA and YU. I. KUZNETSOV 196 The recreation of a tridiagonal matrix

A. G. DOROSHKEVICH and I. M. SOBOL 200 Monte Carlo estimation of integrals occurring in the non-linear theory of gravitational instability

P. N. VABISHCHEVICH and R. V. GASSIYEV 202 Numerical solution of a problem of pressurized filtration under a hydraulic engineering structure

I. A. LOMAZOVA 206 The problem of the existence of a complete axiomatic semantics for programs that do not allow side effects
